

Born from the fire of our Bohemian tradition and cooled in the essence of Scandinavian simplicity, our glass is a celebration of everyday beauty. At Anna von Lipa we craft moments that elevate everyday life into something special. Each piece, carefully crafted by skilled artisans, reflects our commitment to quality and artistry.

We invite you to explore the 2025 collection and join us on this journey to fill your spaces with the light of free-blown glass, art colored with the essence of nature and shaped by Scandinavian philosophy. Discover how we can turn your everyday ordinary into something extraordinary.

Experience everyday beauty.

New
Indigo

GLASS INSIDER
A portion of the batch (raw materials fed into the melting process) consists of crushed waste glass, making glass production more sustainable and environmentally friendly.

Opalines Collection

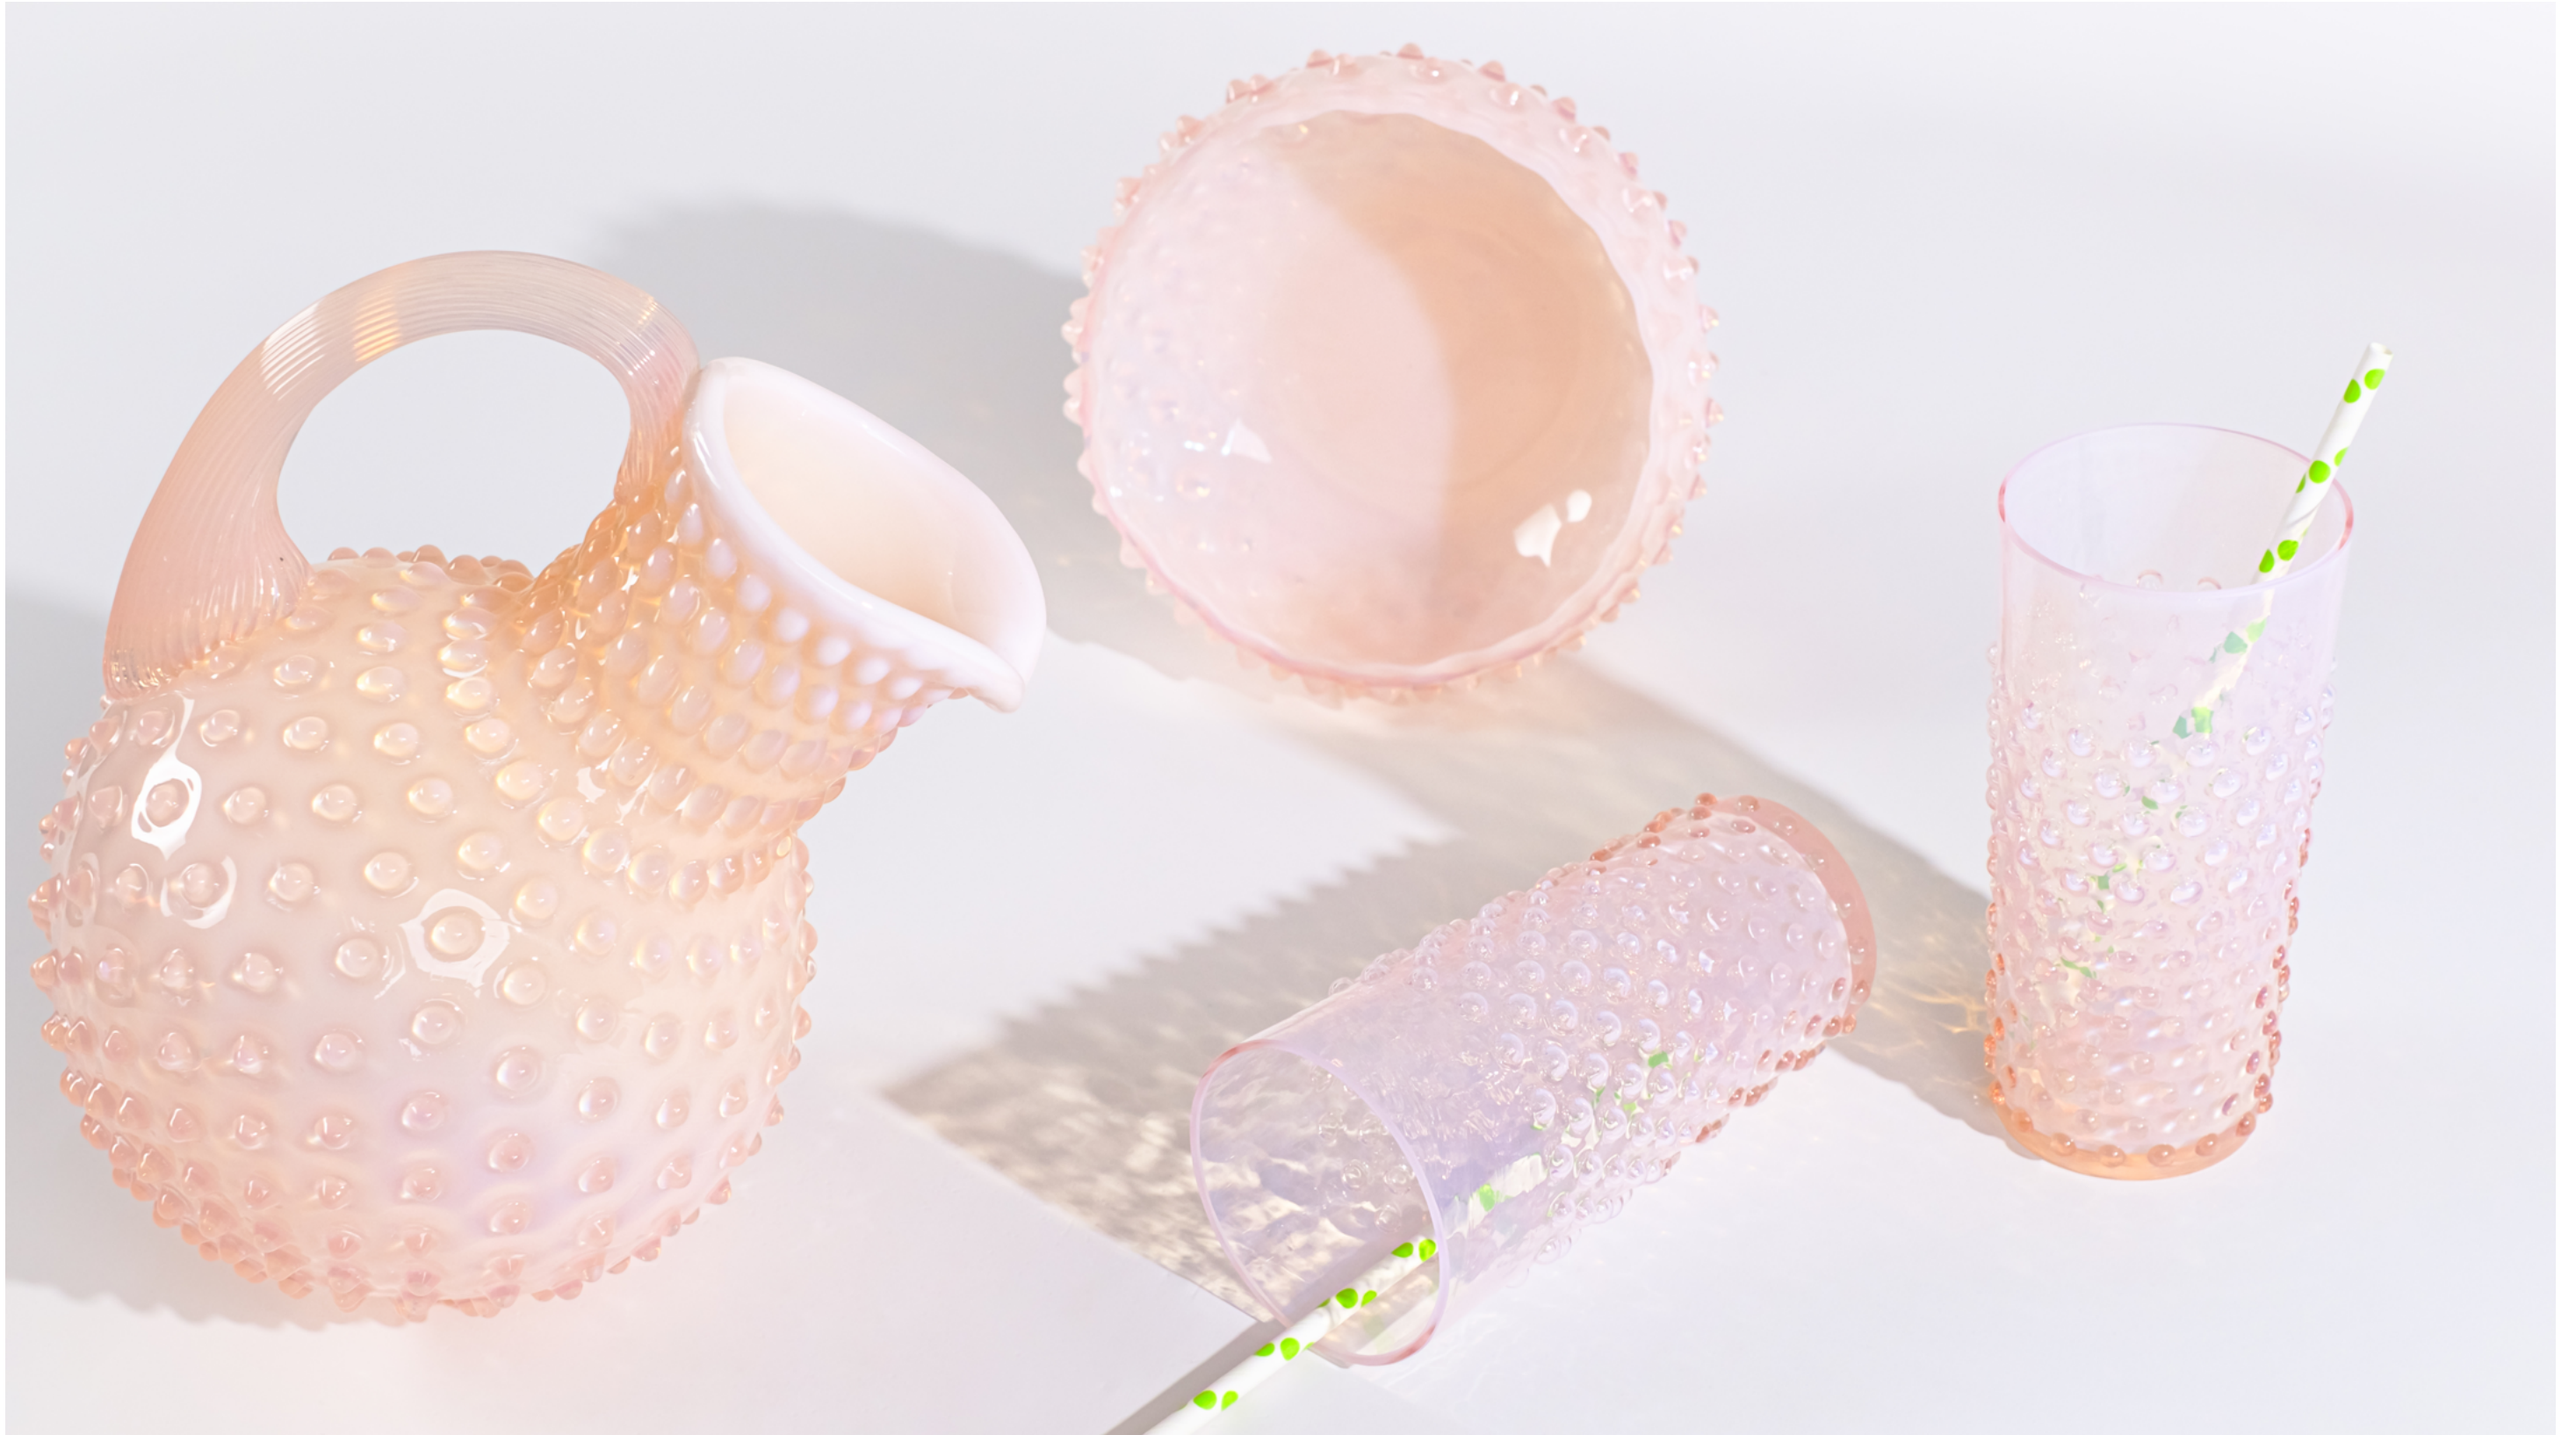

Glass celebrated for its opalescent beauty and unique colors

Discover the enchanting allure of our new Opaline Collection. Originating in 16th-century Murano and celebrated in 19th-century France, opaline glass is famed for its opalescent beauty and rich colors. Our collection features two vibrant hues, meticulously crafted using traditional techniques.

By incorporating specific substances during glassmaking, our blowers create pieces that subtly change with lighting, offering a magical, ever-changing aesthetic. Handblown by skilled Czech artisans, each piece blends the Bohemian glassmaking tradition with modern Danish design, transforming everyday moments into everyday beauty.

GLASS INSIDER

The melting temperature of glass ranges from 1400 to 1600°C. Once melted, the glass becomes “liquid” and can be shaped by pouring, drawing, blowing, or pressing. Cooling is performed in a controlled manner, typically between 700-400°C. After cooling, the resulting glass can be further processed.

Glassworks

Bohemian handmade glass production boasts a rich history dating back to the 13th century. This storied tradition has been passed down through generations, making Bohemia a global center for glassmaking. Czech artisans blend centuries-old methods with modern innovations, meticulously crafting each piece by hand to ensure uniqueness and precision.

The process starts with melting raw materials at high temperatures, followed by glassblowing, shaping, cutting, engraving, painting, and gilding. Each piece of Bohemian glass tells a story of tradition, passion, and dedication, embodying timeless appeal and everyday beauty.

Creating a wooden mold.

Must be continuously turned.

The still-hot glass.

By hand from start to finish.

Final touches.
